Product Description

Altoz XR 540 Zero Turn Mower

The Altoz XR brings the power and precision of commercial mowers to you. This is simply the hardest working residential zero turn mower for those who need a mower that delivers all the results, with none of the compromises.

A mower for discerning homeowners who take as much pride in their equipment as they do in a job well done. With its laser-cut steel chassis, fabricated cutting deck, and heat-dissipating deck spindles, the Altoz XR is engineered to professional-grade standards.

What good is a mower if you don't love the ride? We made sure the Altoz XR has the latest comforts—like a mid-back, adjustable seat—and safety features, so you can sit back, relax, and enjoy the ride.
