Product Description

Blue Diamond Attachments - 60" Skid Steer Drum Mulcher with Carbide Teeth

The Blue Diamond® Drum Mulcher is designed for clearing brush and heavy mulching with a 60" cut width. Our mulcher, with its 34-tooth cutting drum, knows no equal. From clearing acres of dense trees to site prep, no job is too big or small for your skid steer with this attachment.

Our drum mulcher utilizes cutting drum bearings and an overhung load adapter, which are the same components used in 300, 400, and 600 HP mulcher heads. The head can be configured for closed or open loop hydraulic systems, providing versatility based on the operating machine's needs. The unique mulcher body design allows for debris to be shed in minimal accumulations.

Requires: 35-52 GPM high flow

- Low profile tooth anvil (carbide compatible)
 - Secondary edge guard on the tooth anvil
 - Heavy duty overhung load adapter
 - Hydraulic motor case overpressure protection (COP)
 - Heavy duty synchronous drive belt
 - Serrated push bar
 - Optional gate
 - Long-life heavy duty drum bearings
 - Single 1-inch high grade bolt tooth fastening system
 - Reversible chipping teeth standard and carbide teeth available
 - Tooth anvil with secondary edge guard
 - Danfoss H1B 110cc 2 speed motor
-
